3D Visualiser

One of the biggest construction and project management companies on the Balearic Islands is looking for a highly motivated 3D Visualiser to become a key member of an international dynamic team. The position includes a wide range of support functions that you can manage in a flexible and proactive way with a high level of professionalism.

Job Tasks and Responsibilities

- Read and accurately interpret architectural illustrations, 2D CAD files, or other 3D modelling data, as specified within projects and realising those designs as compelling imagery.
- Work closely with the architectural team in the preparation of 3D visualisation.
- Develop and maintain a software library suitable for architectural rendering needs and applications.
- Undertake 2D image compositing, finishing and retouching operations on 3D renderings.
- Understand the concepts and initial design intent, and apply this into a graphic representation.
- Reproducing the architect's concept into a graphic form, or may involve interpretation and artistic design ability to represent the ideas in a graphic form and into photo-realistic 3D renderings and animations.
-

Key Competencies

- Excellent communication skills, both written and oral
- Excellent interpersonal skills with the ability to build and maintain strong collaborative internal and external working relationships and to work alongside clients to deliver innovative design solutions.
- Ability to work collaboratively as part of a team and to respond proactively and when required.
- Strong organisational skills and ability to manage multiple projects and deliver to tight deadlines.
- Good awareness of design trends and creative thinking.
- Creative, with a high degree of flexibility.
- Excellent attention to detail.
- Ability to use relevant graphic design related software to a high level.
- Dedicated to own learning and development.
